PRASAD BHOITE

📍 Hasur Bk | Kagal

📞 +919359070217 | ✉ prasadsb2002@gmail.com.

🎯 Objective

Aspiring Cloud & DevOps Engineer with knowledge in AWS, Azure, Linux, Git, Jenkins, Docker, Kubernetes, Terraform, and CI/CD pipelines. Eager to contribute to automation, infrastructure as code, and cloud deployment strategies while building expertise in scalable and secure DevOps solutions.

💼 Experience

- **Jabil, Pune.**   May 2024 - Aug 2024
  Operator (Internship)
  •Assisted in the product manufacturing process, ensuring adherence to operational guidelines.
  •Performed product quality checks to maintain high standards and minimize defects.
  •Supported in assessing and improving process efficiency under the guidance of senior engineers

🎓 Education

- **K.H.College, Gargoti.**   2022-25
  BSc Computer Science
  Grade : A. CGPA :

- **K.H.College, Gargoti.**   2019-21
  HSSC
  70.83 %

- **Shri Laxmi Vidhyalay Hasur KH.**   2019-20
  SSC
  84.60 %

🏆 Certifications

- Cloud and DevOps Certification – Fortune Cloud Technologies, Pune

💡 Skills

- **Tech Skills:-**
  •Cloud Platforms: AWS (EC2, S3, IAM, RDS).
  •DevOps Tools: Git, GitHub, Jenkins, Docker, Kubernetes.
  •Infrastructure as Code (IaC): Terraform, AWS CloudFormation (basics)
  •CI/CD: Building simple pipelines, version control integration, automated testing concepts
  •Operating Systems: Linux shell,Ubuntu
  •Networking: VPC, Subnets, Security Groups, Load Balancers.
  •Databases: MySQL,RDS,S3
  •Scripting & Programming: Python (automation scripts), Bash scripting
  •Containerization & Orchestration: Docker basics, Kubernetes pods and deployments
- **Soft skills:-**
  (Quick learner, Team collaboration, Good communication, Time management, Analytical thinking.)

📂 Projects

- **Three-Tier Web Application on AWS (EC2 + RDS)**
  Tech Stack: PHP, HTML, MySQL (RDS), Nginx, AWS EC2, VPC, Security Groups.
  •Used AWS EC2 for hosting the web and application servers.
  •Leveraged AWS RDS (MySQL) for secure and scalable database management.
  •Implemented secure connectivity between EC2 instances and RDS.
  •Ensured scalability and performance optimization following cloud best practices.
- **Bus Booking App**
  Tech Stack: Java, SQL.

•Developed a full-featured bus booking system using Java for backend logic and MySQL for database management.
•Implemented features allowing users to search buses, view seat availability, and book tickets seamlessly.
•Designed an admin panel to manage buses, routes, schedules, and monitor bookings.
•Integrated user authentication and a secure login system to protect user data and restrict access.
